Art Unit: 3735

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that

form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United

States.

2. Claims 1, 28, 46, 65 are rejected under 35 U.S.C. 102(b) as being anticipated by

Willard (5,851,176).

Willard teaches a pressure lockout arrangement (10) for an implantable prosthesis

having a housing with an inlet and outlet, a valve (38) disposed between the inlet and

outlet, the valve is biased towards substantially seating the outlet. Willard further shows

a supplemental biasing mechanism (column 7, lines 20-40) that is responsive to

pressure increases from the inlet to increase the biasing of the valve toward sealing the

outlet.

3. Claims 1, 28, 46, 65 are rejected under 35 U.S.C. 102(b) as being anticipated by

Burton et al (5,141,509).

Burton et al teaches a pump assembly for an implantable prosthesis having a housing

with a fluid passageway through the chamber and having an inlet and outlet (64, 62);

and a first valve (58). Burton et al has an outlet sealing mechanism (56) that is

responsive to inadvertent pressure increases from the inlet (Figure 8, column 6, lines 3-

20).

Application/Control Number: 10/821,232 Page 3

Art Unit: 3735

4. Claims 2-18, 29-36, 47-59, 66-72 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to John P. Lacyk whose telephone number is 571-272-4728. The examiner can normally be reached on Mon-Fri, 8:30-5:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Chuck Marmor, II can be reached on 571-272-4730. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the

Patent Application Information Retrieval (PAIR) system. Status information for

published applications may be obtained from either Private PAIR or Public PAIR.

Status information for unpublished applications is available through Private PAIR only.

For more information about the PAIR system, see http://pair-direct.uspto.gov. Should

you have questions on access to the Private PAIR system, contact the Electronic

Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a

USPTO Customer Service Representative or access to the automated information

system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
